WARNING

Failure or improper selection or use of the products and/or systems described herein or related items can cause death, personal injury, and property damage. This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyse all aspects of your application and review the information concerning the product or system in this catalogue. Due to the variety of operating conditions and applications for the products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety, and warning requirements of the application are met. The products described herein, including with limitation, product features, specification, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

Any use of images or information from this document without prior approval from Parker Racor is prohibited.

FIRST FIT FOR OEM. FIRST CHOICE FOR THE INDEPENDENT AFTERMARKET.

Parker Racor is a global leader in engine filtration technology. For almost 50 years we have been a driving force of innovation, with a commitment to delivering the best solutions for our customers.

Working in partnership with world-class automotive OEMs, we design and manufacture first-fit equipment for many of the biggest names in truck and bus. And the identical engine filtration is available in the aftermarket, offering you products with exactly the same fit, form and class-leading performance as the original – and always 100% compliant with vehicle manufacturers' warranty conditions.

This catalogue introduces our products for on-highway commercial vehicles, making it easy for you to find the ideal replacements for your vehicle.

If you need additional technical information, please contact our support team:

HOW TO USE THIS CATALOGUE

Here at Racor our primary business is to design and manufacture complete engine filtration solutions for the world's leading truck manufacturers.

Racor has worked in partnership with many leading automotive OEMs to design and manufacture the product installed as first fit on the engine or vehicle.

The aftermarket version of those filters are also manufactured by Racor and can be found in this catalogue. They are identical to the OEM filter in fit, form, function and performance, and they will not violate or invalidate the vehicle manufacturers warranty conditions.

OEM COLOUR KEY		
DAF	FORD	IVECO
MAN	MERCEDES	mitsubishi
RENAULT	SCANIA	VOLVO

To easily find an OEM look for the colour coded pages in the catalogue.

Once you have found the OEM you can then identify the product type using icons below.

Fuel Euro 4/5	1	FFWS assembly - water sensor, no heater (R60)	20591265	MD5760DTV30RCR01
	-	FFWS assembly - water sensor, 12/24V heater (R60)	20591266	MD5760DTV30RCR02
	2	Replacement element	21380408	R60P-D-MAX
	-	Replacement element	21088101	R90T-D-MAX
	3	Bowl assembly - no 1M ohm Resister	20591254	DRK00408
	4	Bowl assembly - with 1M ohm Resister	21088086	DRK 00203
VOLVO FE II Euro 6, FL III				
Fuel Euro 6	5	Replacement element - primary	21538975	R90G-D-MAX
	6	Replacement element - secondary	21746575	RFE5015

RACOR ACCESSORIES

To help your customers we have the following range of Racor accessories available to the truck aftermarket.

The parts below can help indicate, sense and remove filtration problems that are faced every day during a truck service.

	#	Description	Racor Part Number
RACOR Aftermarket Accessories			
Fuel	1	Active Water Sensor Kit: Analyses electrical resistance at the water probe and determines if water is present For use with all spin on fuel filters	RK30880E
	2	Bowl Wrench: Helps remove your filter bowl with ease. For use with all metal and clear spin on bowls that feature extended ribs.	RK 22628
	3	Vacuum Restrictor Indicator: A Filter Minder that monitors fuel restriction and indicates increased resistance to flow when the filter element starts to become blocked. For use on all fuel filters with air vent plug and port thread 3/8" SAE, 8"-27 NPTF, 3/8" SAE or 1/8"-27 NPTF.	DRK32036
Air	4	Vent Filtration System: Used to clean the dirty air from the Diesel Exhaust Fluid (DEF) and / or the diesel holding tank.	PFA500675000
	5	Eco Vent Filter and Bracket Assembly: Eco Vent Replacement Element	PFA500676000

BULK PACK PARTS

For your convenience we have introduced our fastest moving parts in bulk packed format.

The bulk packed parts are a vital product for the Independent Aftermarket Distributor who can ensure that there is stock to service the customer when he needs it.

	#	Bulk Pack Part #	Description	Pack Qty
RACOR Bulk Packed Elements				
Fuel	1	DRK00372-BP270	Primary element	270
	2	R160-D-RCR-01-BP240	Long Life element	240
	3	R160-D-RCR-02-BP240	Long Life element	240
	-	R260P-BP420	Primary element	420
	-	R60RDRCR01-BP360	Primary element	360
	4	R60RDRCR02-BP360	Primary element	360
	5	R90-D-RCR-01-BP240	Primary element	240
	6	R90RDRCR01-BP300	Primary element	300
	-	R90RDRCR02-BP300	Primary element	300
	-	R90T-D-MAX-BP300	Primary element	300
	7	RS175RCR01-BP300	Secondary element	300
	8	RS250RCR01-BP240	Secondary element	240
	-	RS250RCR02-BP240	Secondary element	240

USEFUL INFORMATION

OEM QUALITY EVERY TIME MAKE THE CHANGE TODAY

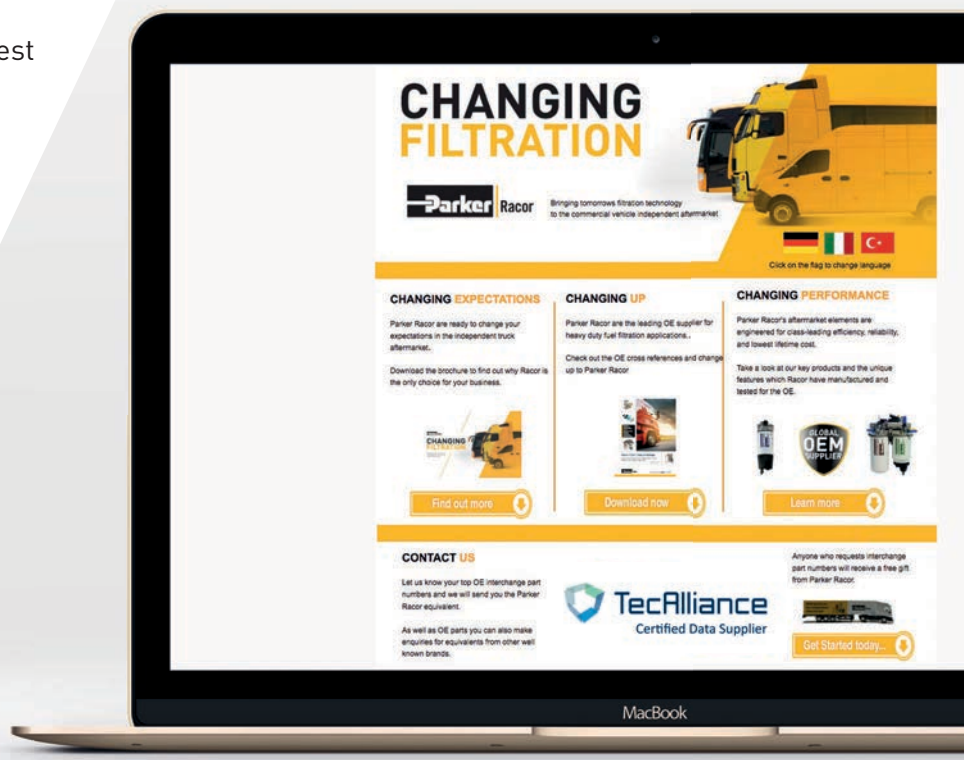

- The world's leading OE CV filtration manufacturer, launching in to the Commercial Vehicle (CV) independent aftermarket
- OE specification, OE manufacturing quality, OE performance
- Complete system solutions – fuel, oil, air and Crankcase Ventilation (CCV)

www.parker.com/changingfiltration

www.parker.com/changingfiltration

Keep up to date with the latest aftermarket developments and the Changing Filtration campaign.

Long-haul protection for commercial vehicles: why lower quality replacement fuel filters are a false economy

Using OEM diesel fuel filters during a vehicle's warranty period is the norm and for good reason. Maintaining this approach after the warranty expires also makes sense. The risks associated with products that may use lower quality parts, materials or technology can potentially have serious and costly implications for the entire vehicle fleet. This article considers the commercial and technical reasons why buying approved fuel filters for the entire operating life of fleet vehicles represents the most cost-effective strategy.

Out-of-warranty replacements

In the warranty period, high-quality filters bought directly from OEMs like Renault, Mercedes and Scania, or their official distributors, will have been tested to the highest standards. From an operator perspective their replacement is an easy-to-facilitate process.

If outside the warranty period, however, there is sometimes the temptation to source cheaper alternatives. The detriments of a non-approved filter rapidly become clear when it is opened up and compared, side-by-side, to an approved one. What's more, in time, the difference in material condition and filter efficiency will widen further. Often, lower material quality offers poor water separation efficiency, at which point filter life will already be terminally limited. Beyond this time, the capability to remove dirt, particles and microbiological contamination is likely to be inferior, while the risk of more contamination will intensify. Soon, it will not only be the fuel filter that is showing the effects; damage to the fuel injection system and engine could potentially have a considerable knock-on impact for the whole operation. Vehicles will need reallocation and any damaged parts, including the filter, will require rapid replacement or overhaul at additional cost.

Chances are, when the vehicle fails, the operator that sought to save money on the initial cost of a replacement filter will be aware of the cause. The operator might, however, be unaware of the real dangers to both fleet vehicles and employees.

The dangers of a short-term approach

To the everyday person, and indeed many experts, it is virtually impossible to distinguish between a non-OEM approved filter and one tested against the exacting standards set by the manufacturer. The fit will be the

same and, apart from colour, the exterior will be nearly identical. Unfortunately, however, the differences will become all too apparent in time.

Milder risks involved with fitting an inferior filter include decreased product life, greater levels of impurities passing the filter and poor engine performance. At the other end of the scale, worst case scenarios could see permanent damage to the fuel injection system, namely the injectors, high-pressure pump and even the engine. There is no way of telling when and to what extent a non-approved filter could present a problem, until it occurs. If an issue happens halfway through a shipment, the immediate cost implications will be felt hard. A replacement vehicle will need to be despatched, or else the customer reimbursed at the operator's cost. The damage to finances, resources and reputation is likely to be significant.

Sticking to the rules

The EU's block exemption rule protects the right of an operator to buy non-OEM approved parts, provided they are of equal or better quality. This rule may suggest that all replacement filters are comparable, but it is key to appreciate just how great a difference there is between one approved by the OEMs and one built for value. Further to the block exemption rule are the European emission standards that seek to minimise the harm of pollution from exhausts, with special attention given to heavy-goods vehicles. Euro VI emission standards have contributed greatly to the requirement for enhanced fuel filtration efficiency.

There is no doubt that operators are already facing increased costs to meet these latest standards. New vehicles and improved infrastructure will, however, be wasted efforts if the diesel filters within them are not up to task. Of course, it makes complete business sense for operators to seek the best possible deal on new diesel filters. However, be wary that if something seems cheaper than it should, chances are it will not provide the long-haul protection required.
